

16: Room 708

Global Emergency Management Enterprise Intranets and the Internet in Disaster Recovery Management

As seen through your eyes each day, there is a need for an International Integrated Emergency Information management strategy. This session will address policies relating to the development of an international information management strategy that jointly supports peacekeeping, handles natural and technological disasters, and responds to complex humanitarian emergencies.

Chair Larry Roeder, *Senior Policy Planning Advisor, U.S.D.O.S. (United States Dept. of State)*

Dennis King, *Information Manager, United Nations Relief Web*

James Dowson, *Consulting Systems Engineer, EMC*

Al Simard, *Science Advisor, Canadian Forest Service*

Robert Fletcher, Jr., *Director, State and Local Preparedness Division, FEMA*
